Requirements

Education

- Diploma in Engineering in Food.

Experience

- 1 to 3 years
- The applicants should have experience in the following business area(s): Group of Companies, Manufacturing (FMCG)

Responsibilities & Context

- Conduct laboratory testing of product samples including pH, Moisture %, Bulk Density, Degree Brix, POV of Palm Oil, and other relevant quality parameters as per standard procedures.
- Ensure proper monitoring and control of critical production processes such as frying, baking, and proofing to maintain product quality and consistency.
- Identify and place on hold any incoming raw materials, work-in-process (WIP), or finished goods that do not meet the required quality specifications.
- Inspect, maintain, and calibrate laboratory equipment regularly to ensure accuracy and reliability of test results; report any non-compliance and recommend corrective actions to the QC Manager/Head of QC in a timely manner.
- Monitor and enforce GMP (Good Manufacturing Practices), HACCP (Hazard Analysis and Critical Control Points), and other food safety and quality standards throughout the manufacturing facility.
- Inform, advise, and update management regarding all quality-related issues and ensure proper implementation of corrective and preventive actions.
- Review, interpret, verify, and summarize quality data collected from different departments and report any deficiencies to the QC Manager/Head of QC promptly.
- Collect and analyze samples according to Quality Control procedures at specified frequencies, ensuring all results are within acceptable ranges and properly recorded on time.
- Prepare relevant quality reports and conduct regular internal inspections of the plant to ensure compliance with quality standards and operational requirements.
- Analyze market complaints related to products, identify root causes, and recommend corrective action plans to prevent recurrence.
- Perform assigned responsibilities during both day and night shifts as per operational requirements.
