অতিরিক্ত প্রয়োজনীয় বিষয়সমূহ

- Age At most 28 years

চাকরির দায়িত্বসমূহ এবং কনটেন্ট

- Evaluate Airworthiness Directives (ADs), Service Bulletins (SBs), and other technical publications issued by authorities or manufacturers, and take timely necessary actions.
- Assist the Continuing Airworthiness Manager in managing compliance with regulations set out by the relevant Civil Aviation Authority of Bangladesh (CAAB).
- Ensure the accomplishment of operational directives, continuing airworthiness requirements, and any immediate safety measures required by the CAAB.
- Assess non-mandatory modifications or inspections from the Type Rated Engineer (TRE) and decide on their application.
- Monitor scheduled and non-scheduled maintenance and prepare comprehensive aircraft work packages.
- Prepare effective removal plans for life-limited parts to minimize unscheduled engine or component removals.
- Participate in aircraft induction, base maintenance, and delivery/re-delivery projects.
- Review and approve work scoping for operational engines, considering lease return conditions and commercial effectiveness.
- Launch and follow up on necessary actions to demonstrate compliance, including physical inspections of aircraft.
- Compile and analyze maintenance and reliability data for reporting and corrective action.
- Monitor reported aircraft defects, analyze in-service data, and liaise with Part 145 organizations and OEMs to resolve grounding events swiftly.
- Ensure the fleet is maintained at an optimum level of component and systems reliability at an acceptable cost to support operational requirements.
- Maintain accurate, up-to-date technical and computerized maintenance records, ensuring both physical and digital storage completeness.
- Generate Configuration Reports, Time Controlled Items (TCI) Reports, and Life Limited Parts Reports for airframes, engines, and APUs.
- Maintain good relationships with OEMs, contracted MROs, and service providers to ensure suppliers provide effective work scopes.
- Perform technical and commercial analysis of contracts to protect the airline's interests, and review invoices to ensure alignment with agreed terms.
- Ensure that aircraft, engines, and components are taken to appropriately approved maintenance organizations.
- Work on a rotational system to obtain broad exposure to all sections of Engineering Department

প্রয়োজনীয় স্কিল এবং অভিজ্ঞতা

- Flexibility and Adaptability
- Good Analytical and Observation skill
- Problem solving and decision making
- Strong Convincing and Negotiation Skills

সাজেস্ট করেছে bjobs

- Database maintenance
