Requirements

Education

- Bachelor of Business Administration (BBA) in preferably in Finance/Banking/Marketing, Economics, or any other related discipline from a recognized university.

Experience

- At least 5 years
- The applicants should have experience in the following business area(s): Banks

Additional Requirements

- Minimum 5–8 years of relevant experience in cash management, corporate banking operations, or client implementation within a bank or financial institution. Prior experience in managing corporate/ institutional client onboarding is essential.
- Strong knowledge of cash management products (e.g., local/foreign currency collections, payments, sweeping, escrow, e-banking).
- Familiarity with core banking systems, host-to-host integration with ERP, API connectivity, and digital banking channel setup.
- Excellent project management and cross-functional coordination skills.
- Proficiency in MS Office, especially MS Project/Excel for implementation tracking.
- Strong problem-solving, documentation, and client communication abilities.

Responsibilities & Context

- Lead end-to-end client onboarding and implementation of cash management solutions for corporate and institutional banking clients, ensuring seamless integration with the bank's systems.
- Collaborate with relationship managers, product managers, and operations teams to gather client requirements and design tailored cash management structures (e.g., collections, payments, liquidity management).
- Manage project timelines, milestones, and deliverables for new implementations, ensuring minimal disruption to client operations and adherence to service level agreements.
- Conduct client training sessions on digital cash management platforms, host-to-host connectivity, and reporting tools to optimize client self-service adoption.
- Identify and resolve implementation risks, technical issues, or documentation gaps during the transition from sales to live service.
- Continuously improve implementation processes by providing feedback to product and technology teams based on client experience and operational data.
